## EXPERIENCE

### Software Architect — 2022–Present

Overviewed over hundreds of client's software solutions, from a small team of other Software Engineers, to ensure committed quality for lasting clients.

### Lead Member of Technical Staff, Tradefull — 2022

Helped lead and grow and research and development team of over 30 members, and architecting massive software updates.

### Senior Software Engineer, OnShift / Avesta — 2019-2022

Did an incredible amount of DevOps work to fix scaling bottlenecks, along with assisted code updates, to help sell and transition the company for more customer volume.

### Chief Technology Officer, Advolve / Zero Origin — 2018-2019

Managed a team of seven different developers to engineer tools for a rapidly growing business in the affiliate marketing and e-commerce space.

### Senior Software Engineer, Performance Administration — 2015-2018

Lead modernizing and rewriting their existing platform for automobile maintenance service programs, to allow for better scale and management.

### Software Engineer, Mongoose Metrics / IfByPhone — 2012-2015

Developed a BI platform for call analytics based on voice recording transcriptions, to help sell the company.

### Web Application Programmer, The Karcher Group — 2007-2012

Helped over 150 different clients develop a web presence, for either marketing or e-commerce.
